

Job Match Agent v2.0 User Guide

Overview

AI-powered application for CV analysis, ATS optimization, tailored CVs, cover letters, interview preparation, interview simulation, dashboard analytics and job tracking.

Key Features

Resume upload, ATS scoring, keyword matching, AI Recruiter Decision, CV recommendations, CV section improver, tailored CV generator, cover letter generator, interview coach, interactive interview simulator, application tracker and dashboard.

How to Operate

Start Ollama, activate the virtual environment, run **python -m streamlit run app.py**, upload a CV and job description, analyse, review recommendations, generate documents, practice interviews, save the application, and monitor the dashboard.

Open from GitHub

git clone <repository-url>; python -m venv .venv; activate with .venv\Scripts\activate; pip install -r requirements.txt; python -m streamlit run app.py

Typical Workflow

Upload CV → Job Description → Analyse → Improve CV → Tailored CV → Cover Letter → Interview Practice → Save Application → Dashboard
